DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-3, in the reply filed on August 30, 2004 is acknowledged.
2. Claims 4-7 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 30, 2004.
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Specification

4. The abstract of the disclosure is objected to because the phrase "The present invention relates to" is extraneous material. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 5, "the market performance" lacks antecedent basis and is not clear.

Claim 1, line 11, "the future market share" lacks antecedent basis and is not clear.

Claim 2, line 6, "the existing market share" lacks antecedent basis and is not clear.

Claim 3, line 2, "the results" lacks antecedent basis and is not clear.

Claim 3, line 4, "the Internet" lacks antecedent basis and is not clear.

Claim Rejections - 35 USC §101

2. Claims 1-3 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim, the recited process must somehow apply, involve, use, or advance the technological arts.

In the present case, claims 1-3 only recite an abstract idea. The recited steps of storing and calculating does not apply, involve, use, or advance the technological arts since all of the recited steps can be performed in the mind of the user or by use of a pencil and paper. The terms “database” and “Internet,” as claimed, do not obviate this line of reasoning. These steps only constitute an idea of how to determine post-launch performance. A computer need not be present to execute any of the steps, and if executed may merely be given by hand (digital data) or orally.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-3, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Shaw, US 6,101,479.

Shaw discloses collecting data, e.g. performance measures, that relate to at least one key success factor, unmet needs and propensity of a decision maker, e.g. a consumer, to lead to increased market share. Calculating future market share from such data would have been inherent with the Shaw disclosure.
